Power Authority

Manage your community's hydro program with this comprehensive software

Software Highlights

- Four different customer types are available and you can customize the names for the different types of customers, for example: Residential, Business, Government and Other
- Enter the initial starting meter reading and the ending meter reading, and the software will automatically calculate the kilowatts per hour usage
- Subsequent invoices will be calculated by the software based upon the last ending meter reading entered and the new ending meter reading
- A flat-rate fee may also be used for all or for certain customer types with the option of assigning a specific amount of kilowatt hours that are included in the base rate
- Service charges, late payment fees and tax can be added to invoices, if needed
- Issue detailed invoices, including an optional usage graph, for one client or all clients with one click
- Record payments made and issue receipts
- Allows for modification or deletion of meter readings entered and of payments made, if required
- If you will be using the software in Ontario, the software supports the Ontario Electricity Rebate (OER) program: it calculates the rebate, including a retroactive calculation, if needed
- Software is compatible with Windows XP, Vista, Windows 7, 8, 8.1, and 10

Reports

- Generate a Customer Account History report which details all invoices, including meter readings, and payments listed by month for a specified date range
- Generate a Customer Balances Listing or a Payment Listing report for one or for all customer types
- Generate a Revenue Listing that details the actual kWh used, kWh invoiced, and flat rate charges by customer type by date range
- Generate a Consumption Summary showing the kWh consumed, the revenue generated, the amount paid on accounts, and the receivables outstanding for all customer types
- Generate a 12-Month Summary that details starting and ending number readings, kWh usage, service charges, late payment fees, any tax, amounts paid, and balance forward amounts for a year
- Generate the complete OER Form with monthly breakdowns (if you are using the software in Ontario)
- All reports can be previewed, printed, or saved as a PDF

About Us

A.D. Morrison & Associates Ltd. has been providing consulting, hardware, and software solutions to First Nations since 1992. We offer a number of off-the-shelf software products, but we also specialize in creating custom software to suit your exact needs.
