# **Water or Sewer Billing**

*Manage your community's water delivery or sewage pickup program  
with this comprehensive software*

### Software Highlights

- Software will be configured to be used for water delivery or for sewage pickup
- Four different customer types are available and you can customize the names for the different types of customers, for example: Residential, Business, Government and Other
- Calculate charges based on the cost per cubic metre (water) or per load picked up (sewage) or use a flat fee, including the option to charge more per additional cubic metre used or per additional loads picked up
- Service charges, late payment fees and tax may also be applied to invoices, if needed
- Enter the meter reading (for water) or the number of units picked up (for sewage) and the software will automatically calculate the amount owing
- Issue detailed invoices, including an optional usage graph for water, for one client or for all clients with one click
- Record payments made and issue receipts
- Allows for modification or deletion of amounts entered and of payments made, if required
- Software is compatible with Windows XP, Vista, Windows 7, 8, 8.1, and 10

### Reports

- Generate a Customer Account History report for one customer which details all invoices issued and payments made within the date range specified
- Generate a Customer Balances report showing current balances owing by customer type
- Generate a Payment Listing which provides information on payments made by customer type
- Generate a Revenue Listing which provides a complete breakdown of all charges comprising each customer's invoices and the revenue generated from each customer
- Generate a Consumption Summary showing the units of water used or of sewage picked up, the revenue generated, the amounts paid on accounts, and the receivables outstanding for all customer types
- Generate a 12-Month Summary that details all charges for all clients, including payments made and any balances currently owing over the 12-month span selected
- Reports can be generated by date range selected for all customer types or for one customer type
- All reports can be previewed, printed, or saved as a PDF
